# MATEMATIKA

# MATEMATIČKI BINGO

Ideju sam našla na netu :)

Svaki učenik dobije jednaki broj kartica (dvije ili tri), a na svakoj kartici je napisan različit dvoznamenkasti broj. Bacam kockicu, a oni zapisuju broj s kockice na svoje kartice.

Zbrajanjem brojeva trebaju doći do zadanog broja na karticama. Igramo sa dvije kartice, tri, ...

BINGO se računa samo ako su sve kartice popunjene.

Broj kojeg dobijemo bacanjem kockice smiju zapisati samo jednom, samo na jednu karticu. Kocka koju bacam je velika, od spužve pa na nju stavim brojeve koje želim.

Kartice sam plastificirala, a na njih lijepimo "post-it" papiriće. Htjela sam da svatko ima marker za bijelu ploču, al mi je to preskupo da kupujem za svakog učenika.

Našla sam papiriće u obliku majice pa su nam te baš cool.

# HRVATSKI JEZIK

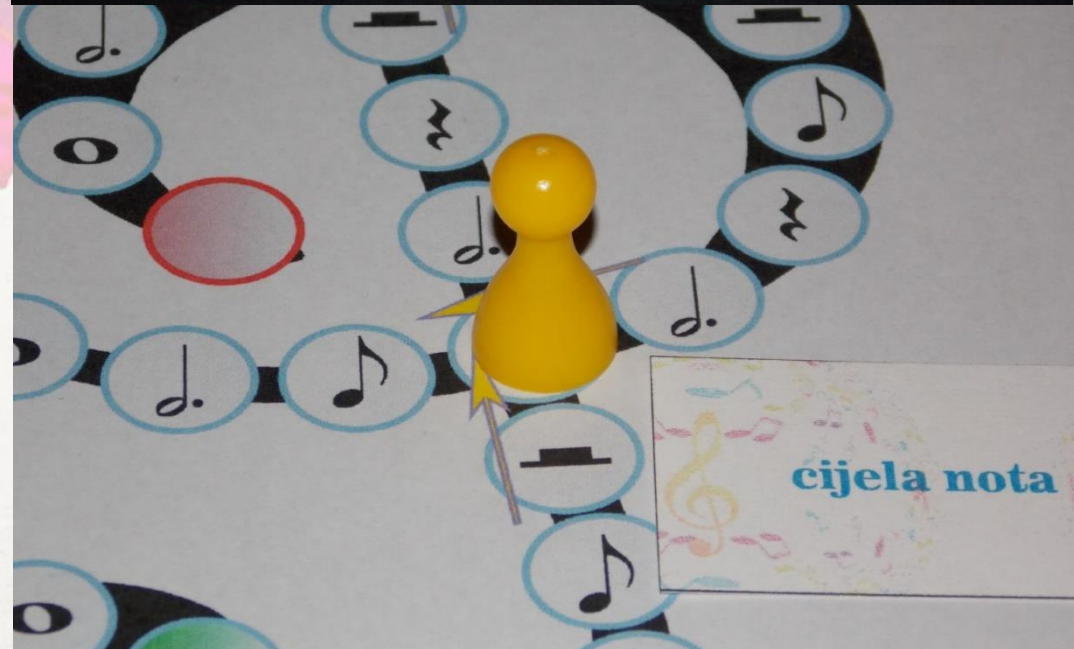

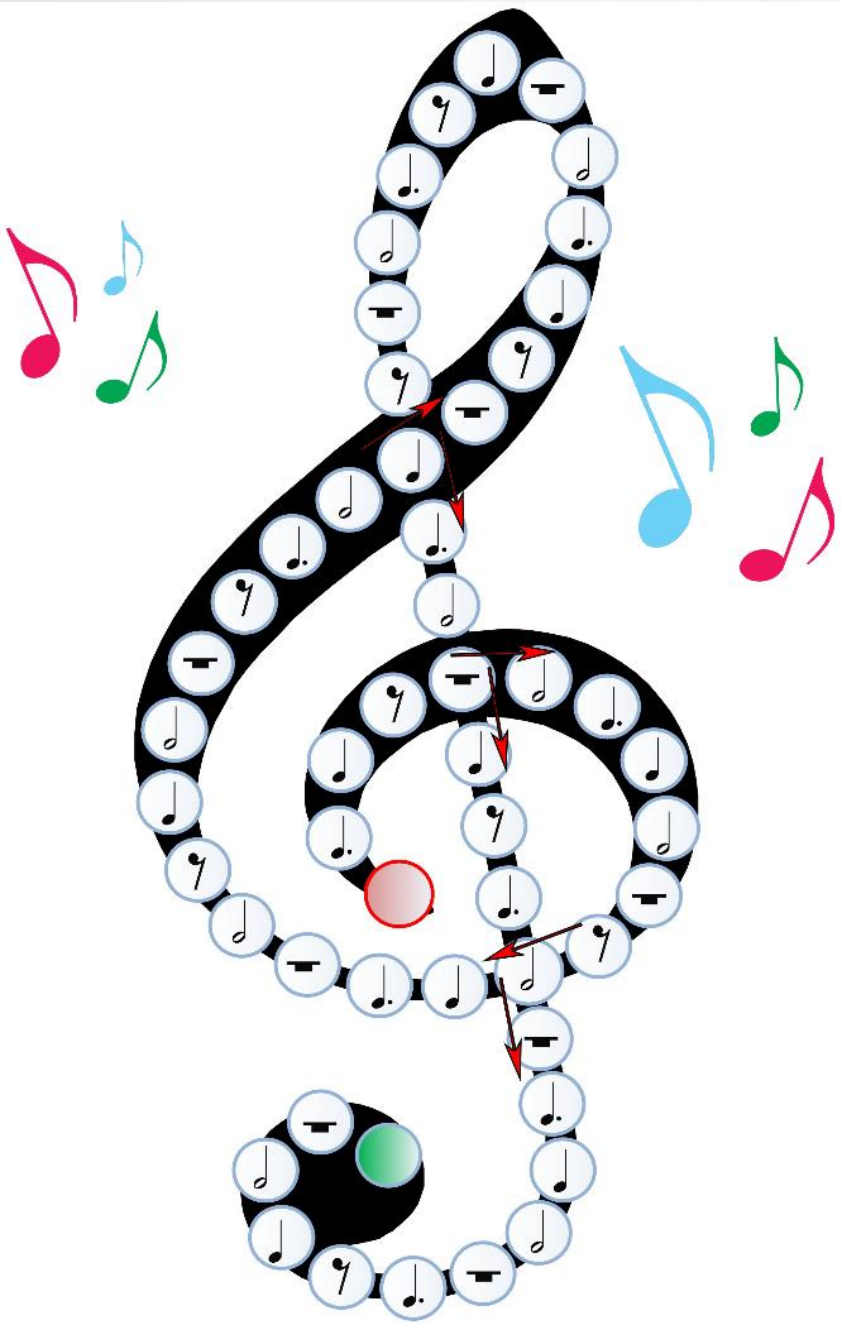

A hand is shown on the right side of the image, holding a black spray can with a red stripe and a green nozzle. The hand is spraying paint onto a light-colored, textured wall. In the background, there is a large, vibrant splash of paint in various colors including red, orange, yellow, green, blue, and purple. The splash is dynamic and energetic, with many small droplets and larger splatters. The overall scene is bright and colorful, suggesting a creative or artistic activity.
