Dubrovnik, 25. travnja 2024.

## Task 1 – WRITING

### **TASK:**

**Artificial intelligence (AI) technology continues to evolve every day, spreading into unimaginable areas. Smart gadgets, smart home appliances, and even whole smart houses have already become a thing of the present.**

**Think about the areas in which AI may expand in the future. Will its achievements be good or bad for humankind? In which ways? Explain your viewpoint.**

Use the writing guide to help you:

Paragraph 1: As an introduction, give your opinion on the present development of AI regarding the effects it has on our daily lives.

Paragraph 2: Describe the area or areas you feel AI will have the greatest influence on in the future. Give arguments as to why you believe that is so.

Paragraph 3: To sum up, give an explanation on why you think this will have positive and/or negative consequences on humankind.

The essay should be between **230 and 250 words** long. Do not forget to use formal English!

Organise your writing in paragraphs.

You may use the blank paper provided for making notes, but make sure that your essay is neatly and legibly written in the space provided below.
